

Stefano Zanon

Vicenza, Italy

Profile

Computer Engineering student at the University of Padua focused on algorithms, AI, and scalable systems, currently working on research in large-scale diversity maximization. Selected for competitive programs such as ELICSIR and actively involved in the Italian innovation ecosystem through Confindustria Vicenza.

Education

Università degli Studi di Padova Oct 2023 – Jul 2026

BSc in Computer Engineering, final vote: 110/110 cum laude. Arithmetic GPA: 29.70/30. Relevant activities:

- **Thesis:** ongoing research project with potential for publication on efficient algorithms for large-scale diversity maximization in the presence of outliers.
- **OS Lab Course:** produced a comprehensive video lecture course for the Operating Systems Lab. Officially distributed by the course professor as supplementary material, actively supporting 150+ students annually.

Liceo Scientifico G.B. Quadri Sept 2018 – Jun 2023

Scientific Lyceum (Traditional Curriculum): graduated with a score of 100/100.

Awards

Contaminazioni Ortogonali – ELICSIR Foundation Oct 2025 – Sept 2026

- Awarded a competitive annual scholarship as one of 20 top STEM students nationwide selected for a multidisciplinary innovation program in computer science.
- Delivered an interactive lecture on greedy algorithms, focusing on audience engagement and effective technical communication.
- Participated in the Approximate Nearest Neighbor competition: 2nd place in memory usage and fast index construction categories. Engineered a high-performance search engine in C++, implementing an optimized approach based on clustering and code adjustment quantization.

Relevant Experiences

NextGen – Confindustria Vicenza Nov 2025 – Present

- Collaborating with entrepreneurs and board members to design strategic initiatives aimed at retaining young talent and high-potential graduates within the Vicenza area and Italy.
- Contributing to roundtable discussions on innovation, territorial marketing, and professional development programs.

Hackathon Monte di Malo – Elevator Innovation Hub May 2026

- **1st Place Winner:** Developed and pitched *Arboris*, a gamified mobile app aimed at revitalizing the local hillside territory and fostering community engagement. Designed an interactive trail-exploration system utilizing QR codes and mini-games to enhance the hiking experience and promote sustainable tourism across all age groups.

Horizon Business Game – Economics Network Oct 2025 – Dec 2025

- Architected a Knowledge Management System (KMS) for STAM S.r.l. based on AWS, which integrated autonomous ETL data processing and AI based data interaction with users.

Internship – Confindustria Vicenza Mar 2022 – Jun 2022

- Improved data reliability across 500+ company profiles on Confindustria Vicenza's platform by standardizing and verifying key business information, such as contact details, certifications, and activity descriptions.
- Compiled reports highlighting incomplete or outdated company websites, supporting improvements in data quality.

Leadership

Musical Lab Management – Liceo Scientifico G.B. Quadri Sept 2019 – Jun 2023

- Led a team of 20+ students to organize live performances, managing logistics and sound engineering.
- Invested school funds in new audio equipment optimizing both technical quality and participants' experience.

Skills & Languages

- **Languages:** Italian (native), English (C1 Cambridge Advanced).
- **Programming Languages:** Java, C++, C, Python, Matlab, Go (basics), HTML/CSS (basics), Dafny (basics).
- **Tools:** Git, GitHub, LaTeX, VSCode, Figma, PostgreSQL.
- **Frameworks / Libraries:** Flutter (basics), Keras, Manim.
- **Creative:** Ableton, DaVinci Resolve, Lightroom.
