Stefano Zanon

Vicenza, Italy · s.zanon.2004@gmail.com · www.linkedin.com/in/stefano-zanon-406b70375/

Profile

MSc student in Computer Engineering at the University of Padua, where I also earned my BSc (110/110 *cum laude*). My work focuses on algorithms, AI and scalable systems: I co-authored a paper on streaming algorithms for robust max-min diversification, available on arXiv. Selected for the Scuola Ortogonale of the ELICSIR Foundation and for LeadTheFuture, and actively involved in the Italian innovation ecosystem through Confindustria Vicenza.

Education

Università degli Studi di Padova — MSc in Computer Engineering Oct 2026 – Jul 2028 (expected)
Track: Intelligent Data Engineering and Algorithms.

Università degli Studi di Padova — BSc in Computer Engineering Oct 2023 – Jul 2026
Final grade: 110/110 *cum laude*. Weighted GPA: 29.64/30.

- **Thesis:** algorithms for diversity maximization with outliers, supervised by Andrea Pietracaprina and Geppino Pucci. The research continued after graduation and led to the paper listed below.
- **OS Lab video course:** produced a complete video lecture course for the Operating Systems Lab: content, recording and editing. Officially distributed by the course professor as supplementary material and used by 150+ students every year.

Liceo Scientifico G.B. Quadri — Scientific Curriculum Sept 2018 – Jun 2023
Graduated with a score of 100/100.

Publications

A. Pietracaprina, G. Pucci, **S. Zanon**. *Streaming algorithms for robust max-min diversification*. Preprint, arXiv:2610.01456, 2026.

Awards

Scuola Ortogonale — ELICSIR Foundation 2026 – 2028

- Selected for a two-year excellence programme and scholarship awarded to 20 top master's students in computer science in Italy.

LeadTheFuture — Mentorship Programme Sept 2026 – Present

- Accepted into a selective mentorship programme for high-achieving Italian STEM students (acceptance rate below 20%), connecting them with mentors from leading companies and universities.

1st Place, Hackathon Monte di Malo — Elevator Innovation Hub May 2026

- Developed and pitched *Arboris*, a gamified mobile app for revitalising the local hillside area: an interactive trail-exploration system using QR codes and mini-games to promote sustainable tourism and community engagement across all age groups.

Contaminazioni Ortogonali — ELICSIR Foundation Oct 2025 – Sept 2026

- Awarded a competitive annual scholarship as one of 20 top STEM students nationwide, for a multidisciplinary innovation programme in computer science.
- Taught an interactive lecture on greedy algorithms, focusing on audience engagement and clear technical communication.
- Approximate Nearest Neighbor challenge: 2nd place in the memory-usage and index-construction-speed categories with a high-performance C++ search engine based on clustering and code-adjustment quantization.

Experience

NextGen — Confindustria Vicenza Nov 2025 – Present

- Working with entrepreneurs and board members to design initiatives aimed at retaining young talent and high-potential graduates in the Vicenza area and in Italy.
- Contributing to roundtables on innovation, territorial marketing and professional development programmes.

Horizon Business Game — Economics Network Oct 2025 – Dec 2025

- Architected an AWS-based Knowledge Management System for STAM S.r.l., integrating autonomous ETL data processing and AI-assisted data interaction for end users.

Musical Lab management — Liceo Scientifico G.B. Quadri Sept 2019 – Jun 2023

- Led a team of 20+ students organising live performances, handling logistics and sound engineering, and managed the investment of school funds in new audio equipment.

Internship — Confindustria Vicenza Mar 2022 – Jun 2022

- Improved data reliability across 500+ company profiles on Confindustria Vicenza's platform by standardising and verifying contact details, certifications and activity descriptions, and reporting incomplete or outdated company websites.

Skills & Languages

- **Languages:** Italian (native), English (C1 Cambridge Advanced).
- **Programming:** Java, C++, C, Python, Matlab; Go, HTML/CSS, Dafny (basics).
- **Tools:** Git, GitHub, LaTeX, VS Code, PostgreSQL, Figma.
- **Frameworks / libraries:** Keras, Manim; Flutter (basics).
- **Creative:** Ableton, DaVinci Resolve, Lightroom.
